Dear Sir or Madam,

Thank you for your interest in our water drinking bowl "TILTY Bowl" for dogs and cats.

For this we would like to introduce you to the extraordinary spill- and splash-proof water bowl which is protected under the international PCT/EP and show you some more details.

Where to use our Tilty Bowl

At Home:

The Tilty Bowl is perfect for use at home where there is a risk of tile slipping or if you have a delicate floor covering. Accessible water at all times, independent of the feeding bowl. Terrace / garden.

On the road:

Be it in the car, on the train, on a boat, on a plane trip or in a mobile home. The water stays in the drinking bowl and is permanently available to your loved pet. You do not need to have a water reservoir at hand; no search for water at rest stops.

Gastronomy, animal ambulance and Retail:

As a shopkeeper or restaurant operator, you always want to offer fresh water to your customers' darlings, even in the summer. But are the circumstances of spilled water shying you away? Whether inside or outside, the Tilty bowl offers you a solution and is also a decorative element by the way. (Tip of our customers: The Tilty Bowl can be "put on the chain" with the help of a small hole at the lower edge area.)

Benefits / Features of the Tilty Bowl

- The name TILTY is no coincidence! "To tilt" ... this is the point about our drinking bowl. Thanks to the 3 chamber system, it is possible to completely tilt the container. Even upside down, no water will escape.
- Water tank made of transparent material:
 - Floating particles of any kind (sand, insects, food residues, leaves, etc.) can easily be detected and replaced with fresh water
 - You always see if you need to fill up with new water
- "Easy to open" is one of our guiding principles. With a small twist, the lid of the Tilty Bowl is open and you can clean it, etc.
- Food safe. As a dog owner this point was particularly important to us. We process only high quality plastic granules – PP. BPA free.
- The bottom of the Tilty Bowl's is convex. Thanks to this simple detail, the particles that fall into the drinking bowl slide laterally into the edge.
- A small remainder of water, which gets dirty over the time, remains in the bottom container and can not be drunk by the dog.
- In dog breeds with longer ears, the ears stay dry. They no longer dive into the water bowl.
- Dishwasher safe ! Useful at home as well as at the veterinary / animal ambulance – hygiene.
- The opening is optimally adapted to the drinking behavior of the dog. Not too small and not too big. Since the opening has been designed as small as possible in terms of surface, the likelihood of foreign particles falling into it is lower.
- Another advantage has emerged in our test phase:
According to veterinarians there is also a health benefit for dogs with longer snout hair dressing. This benefit affects well over 150 dog breeds. After an initial assessment, the Tilty Bowl can even be explicitly recommended for these dog breeds.
Thanks to the smaller drinking opening and the shape of the funnel, less water / moisture comes to the hair of the dog's mouth. Fur loss and inflammation in the snout area are a common problem in some dogs. An open drinking bowl allows the dog almost the complete "immersion" of the snout into the water.

Our TILTY Bowl is available in two sizes:

Size M corresponds to approx. 0.6 liters of water capacity and size XL approx. 1.6 liters.

In order to meet the requirements of our customers in terms of design and optics as much as possible, we have decided to offer eight colors as standard colors:

White; Light Grey; Anthracite Grey; Grey Brown; Crema; Rose; Pigeon Blue; Pink

Have you also recognized the benefits of the unique TILTY Bowl?

Then we would be very happy to cooperate with you!

Mit besten Grüßen
With very best Regards,

Ihr Tilty Bowl Team
Boris Vujnovic
